

Subject: More errors found and corrected

Date: Thursday, August 6, 2026 at 8:17:03 PM Central Daylight Time

From: Mandell, Laura C

To: Lynda Pratt (staff)

Dear Lynda:

Hello! I hope that you are feeling better and that the heat is not too oppressive.

In the course of creating the People Mentioned List and lists of letters to / mentions in on the Correspondents and People pages, I discovered errors in the following xml files:

3.1112

3.1203

4.2026.1

5.3107

6.3268

6.3486.1

7.3833

7.3925

7.4125

People

Correspondents

I uploaded into dropbox (newXML) 4.2026.1 without thinking about it a day or so ago (if you made corrections in that letter and I overwrote your corrections, they will have to be redone: sincere apologies!), but for the others, I have created a "saved" folder inside newXML folder containing the old versions in case you made changes to the xml. If you haven't changed those pages, you can delete the saved folder. If you HAVE, especially to people or correspondents, let me know and I will add the changes to the new xml files -- I think I can find your changes using a comparison tool.

Most of the changes I have made to the letters xml files involved fixing bad links ("eople" to "people" and ".html" to ".html" to, for example) except

Letters:

1. 3.1112 -- the letter is addressed to Edith but the link went to Edward Southey -- I changed the link to FrickerEdith
2. 7.4125 -- the letter is addressed to Eliza but the correspondent's link went to the whole Fricker family; I changed the link to Eliza.

3. <person xml:id="HutchinsonJoanna">Hutchinson, Joanna</person> is not in people list, and her brief bio is given in a note so I removed the <ref> tag around her name (letter 7.3833).
4. In Part 7, the id 'InglisSirRobert' was used; I changed those to 'InglisHarry' to match the id in the people list and links to him in part 5. There were a number of ref tags using the wrong id throughout the letters and paratext (BeaumontMary instead of BeaumontMargaret, e.g.), and those kinds of mistakes are natural, to be expected. I wondered though if it would help for you and Averill to have the files I use to check link ids called "people_names.xml" and "places_names.xml," and so I have uploaded them to dropbox in the newXML folder.
5. There were a lot of <ref type="m" target="people.html#[personID]"> tags with spaces in them between the end of the personID and the close quotation mark which wreaks havoc on computer systems (don't worry, the links still work, but in terms of my xslts, it's difficult). If the letters that Averill has coded so far for Part 8 have spaces in the links, do NOT go back and correct them by hand: send them to me and I can run an xslt to fix them; then we can try to eliminate those spaces going forward.
6. Mary Shelley appeared with a link in letter 7.3925, a people mentioned tag (<ref type='m' target="people.html#ShelleyMary"> around her name in the letter text which says "Godwins [sic] daughter", but her name is not tagged in the note which offers info about her and she is not in the people list, so I removed the <ref> tag. This means that Mary Shelley does NOT appear on the "List of People Mentioned page". Do you want to put the link back in and add a short bio, xml:id="ShelleyMary", to the People page?

Correspondents list: I pulled names of addressees from the letters themselves using xslt, and some addressees were not on the correspondents list. I added to it:

Bell, John (Newcastle) -- letter 4.2427 is to him -- I distinguished the two John Bells on the list by adding "(merchant)" and ("bookseller")

Clarkson, Thomas -- letter 7.4123 is to him

Everett, James -- letter 6.3626

Feltham, John -- letter 2.306.1

Hatherton, Edward John Littleton -- letter 7.3956

James, Paul Moon -- letter 4.1854.1

Knox, William -- letter 7.4233

Lamb, Charles -- letter 7.4088

Morgan, Mary -- letter 6.3565.1

<https://cha.artsci.tamu.edu/SoutheyLetters/HTML/paratext/corresp.html>

And, at the end of the list of correspondent names on the Correspondents page, I added a

section listing letters to Unknown correspondents.

In addition to that letter with an unknown addressee, there are three correspondents who are uncertain and consequently not on the correspondents list:

BarringtonCJ - Barrington, Charles James -- letter 4.2236

HarrisJ - Harris, John -- letter 4.2236

FreelingFrancis - Freeling, Francis -- letter 2.306.1

Do you want me to list those two letters, 4.2236 and 2.306.1 to the "Unknown Correspondents" section or do you want me to add Charles, John, and Francis to the Correspondents list?

Note: there are many names in the Correspondents list that do not (yet?) have letters addressed to them: you can see it in the online version because there will be no "letters" when you click on the "Letters To" link under their names. I didn't remove any of them -- I am presuming that you add to the Correspondents list as you work through forthcoming parts? But I wanted to make sure that there aren't any coding errors in the letters that are already finished (bad addressee tags, which is what the xslt pulls names from).

Except for the Search page which I won't create until after everything has been corrected:

EVERYTHING is up at <https://cha.artsci.tamu.edu/SoutheyLetters> including People Mentioned and Correspondents (both with downloadable csv files) and I'm standing by for changes and corrections.

Warmest regards, Laura

P.S. I hope the formatting in this message isn't abysmal; I'm cutting and pasting from notes.
